FRANCESC MATEU VALLESPÍN

AI & DATA SCIENCE STUDENT | SOFTWARE ENGINEERING

New York, NY · mateu.fra@gmail.com · +1 (347) 805-7011

GitHub: github.com/fmateu2

PROFILE

Third-year AI & Data Science student at La Salle Barcelona, on exchange at Manhattan University. Seeking an internship in software engineering, AI or data, open to opportunities across industries. Project experience in C systems programming, Python and data applications.

EDUCATION

La Salle Barcelona

BSc Artificial Intelligence & Data Science

Sep 2024 - Present

Expected graduation: June 2028

Merit-based scholarship recipient.

Manhattan University

Computer Science Exchange
New York, United States

Aug 2026 - May 2027

Fall 2026 midterm grades: all A's

Nanjing University of Science and Technology

International Academic Program
Nanjing, China

Jun 2026

FURTHER EDUCATION

Databases: Relational Databases and SQL

Stanford Online | In progress

High-Dimensional Data

HarvardX | Planned study

CFA Level I

Planned preparation

LANGUAGES

English: Fluent
Spanish: Native
Catalan: Native

SELECTED PROJECTS

Citadel System | Distributed Network Simulation

C · TCP Sockets · Processes · Synchronization

- Co-developed a decentralized simulation in which independent processes exchange product information and execute trades.
- The system combines TCP communication, binary messages, routing, synchronization and signal handling to coordinate independent nodes.

WearWise | Recommendation System

Python · MongoDB · Streamlit · Forward Chaining

- Co-developed a wardrobe assistant combining AI image extraction, attribute normalization, MongoDB storage and rule-based outfit recommendations.

Verity | Classification Prototype

Python · Random Forest · Logistic Regression · SVM

- Co-developed an academic classification prototype using linguistic features and simulated physiological signals.
- The project includes 23 engineered features, three classifiers, a Python terminal interface and a separate browser demonstration.

TECHNICAL SKILLS

Programming: Python, Java, C, SQL, R, MATLAB, Bash, AWK
Data: Statistics, probability, data analysis, machine learning
Systems: TCP sockets, process synchronization
Tools: Git, Linux, Vim

LEADERSHIP & ACTIVITIES

Roller hockey: Active player with experience as team captain.

Boating: Yacht Skipper qualification; enrolled in Yacht Captain training.
